Purpose of the Contest

The principal role of an Aesthetician is to perform services to enhance client physical and psychological well-being through manicures, makeup and body therapy.

The challenge evaluates each competitor's readiness for employment and recognizes outstanding students for their excellence and professionalism in the aesthetic industry.

Skills & Knowledge to be Tested

Manicure: Galaxy & Mystery Themes

Competitors will begin by designing 10 nail tips on a nail tip holder.

In this creative and technical nail competition, participants will showcase their skills through a two-part challenge combining nail tip design and live model application, using only the tools and products that are available at the school.

Competitors will begin by designing 10 nail tips: five with a Galaxy theme and five featuring a combination of two randomly selected themes from a set of five pre-released design inspirations (see end of document for mystery designs).

The selected themes will be chosen on the day of the competition, and competitors will creatively interpret and combine them across the remaining five tips.

After completing the nail tips, competitors will perform a dry manicure on a live model, demonstrating proper technique in clipping, filing, buffing, and cuticle work. They will then apply all 10 pre-designed tips—five Galaxy-themed and five combining the selected themes—ensuring a balanced, cohesive presentation.

Creative Makeup: Galaxy Theme

In this fantasy makeup competition, competitors will create an original, Galaxy-themed makeup design covering 75% of the model's face, neck, and décolleté, extending two inches below the collarbone. Competitors may use the makeup medium of their choice (excluding airbrush) and are encouraged to be creative in their interpretation of the theme. The remaining 25% of the area may be left bare or minimally blended for balance, but the focus should be on showcasing detailed artistry and imaginative design within the themed area.

3D embellishments and any other decorative additions on the face, neck, or décolleté are not permitted. This includes rhinestones, gems, glitter pieces, or any raised or non-makeup materials. Accessories such as hair bands, clips and hair adornments will be judged separately during a designated judging time (see Project). Competitors must use their own makeup products. The final look should demonstrate advanced technical skill, creativity, and thoughtful execution across the entire design area.

Makeup Sanitation Procedure How To

- Make sure all brushes and implements are clean and disinfected prior to the service
- All cream/liquid products must be dispensed using a clean spatula onto a clean palette.
- Powder makeup products may be sprayed with 70% alcohol prior to use for disinfection purposes.
- Liquid eyeliners cannot be disinfected, if being used the product must be new (in packaging) and either disposed of or given to the model afterwards.
- Do not double dip mascara spoolies as these are one time use only.
- Alcohol activated cream paints may be used as the alcohol will disinfect the product each time it is sprayed.
